Unlike the last two years, there have been a number a members very close to the top ten, so I have decided to produce a top 15. There was a notable first appearance by Graham Clarke in the top ten, and a return from Titch. If you think I may have missed a significant performance then please let me know kevin.reeves@myport.ac.uk

The above rankings are based on the best individual performances for the club during 2011. They are rated using the official age-grading tables released on 1 May 2010 by World Masters Athletics, which allow for age, gender and event (track or road). In this way a direct comparison can be made between people and the percentage relates to how good a performance is compared to the world record (100%).
